Atkins High Grade Silver Steel Saws

are ground accurately to gauge by our patent process and require less set than other saws.

The steel is the finest made and is susceptible of a high, even and tough temper, because of which the ATKINS Saws will hold a keen cutting edge longer and do 25% more work without filing than other saws.

They Are Fast and Smooth Cutters

Every saw fully warranted and guaranteed to give entire satisfaction.

Ask your dealer for them.

This table is figured at time and one-half for over time. As there is no uniform scale of wages paid nor number of hours work, each locality having its own scale and hours of work, it is a universal table.

INSTRUCTIONS: To find the amount due you at any rate from 25c to 55c per hour, find the column containing the rate you are paid and follow it down to the number of hours you have worked. Opposite is what is due you. For example: If you have worked 7½ hours at 30c per hour, 7 hours at 30c is found to be \$2.10, and ½ hour, 15c. This makes a total of \$2.25 due you for 7½ hours work at 30c per hour regular time. If you are paid regular time for 7 hours work and over time for ½ hour, 7 hours at 30c per hour, regular time, is found to be \$2.10, and ½ hour, over time, 22½c. There would then be due you \$2.32½.
